

PAVER EDGING

LOW-PROFILE ALUMINIUM EDGING

Quick and easy to install, Techniseal®'s **LOW-PROFILE ALUMINIUM EDGING** allows for durable hardscape installations that blend seamlessly into any commercial or residential landscaping plan. The discreet Low-Profile Aluminium Edging helps prevent pavers or other hardscape materials from shifting or moving.

Made from high-grade aluminium, this edging won't deteriorate from exposure to the sun, frost, and other adverse weather conditions. Very flexible, it can be installed in a straight line or bent into any curve without cutting.

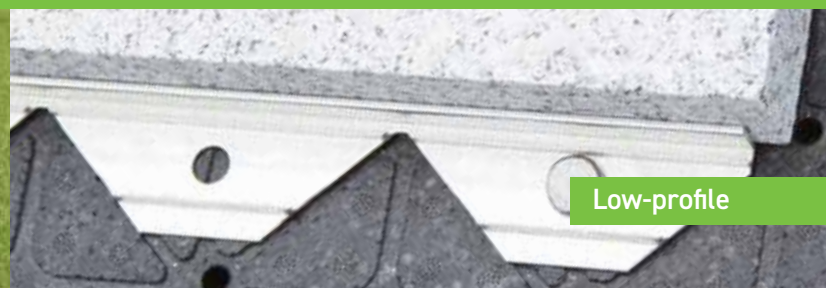

For maximum strength at all times, use Techniseal's

PAVER EDGING NAILS 70971150

- Heavy-duty 10" nails
- Perfect for use with Techniseal hardscape edgings

Easy to curve

Low-profile

- **Discreet** - A low profile design that conceals the edging for a crisp installation.
- **Weather-resistant** - Won't deteriorate from exposure to the sun, frost, etc.
- **Flexible** - Easy to bend into any curve or create 90° angles without cutting.
- **Versatile** - Ideal for the installation of pavers, flagstones, bluestones, granite, porcelain pavers and more.
- **Each section is 8' 4" long and 5/8" tall.**
- **Made of 6063 aluminum alloy with T-5 hardness.**

PAVER EDGING

LOW-PROFILE ALUMINIUM EDGING

Techniseal's Low-Profile Aluminium Edging ensures the superior stability and durability of driveways, patios, walkways, and other hardscape installations in commercial and residential areas.

It is perfect for securing pavers, concrete slabs, and natural stones in place and keep them from shifting or sinking throughout the years.
