UPDATE

August 6, 2020
Make sure that you have an up-to-date technical data sheet in hand by consulting our website: techniseal.com
U.S.A. and Canada: dial 1 800 465-7325
Others: dial (514) 523-8324 (Canada)

APPLICATIONS

- For concrete & wet-cast pavers, natural stone and aggregates
- Recommended for driveways, parking lots, patios and walkways

PROPERTIES

- Enhance the colour of pavers
- Stabilizes sand or aggregate joints
- Stain guard
- Forms a protective film

DESCRIPTION

Made of acrylic and plasticizers, WET LOOK (WL1-2) Protector is specially designed to protect natural stone, concrete and wet-cast pavers and to stop the movement of aggregates or sand (conventional paver joints) while imparting a wet look gloss to surfaces. It prevents deterioration caused by chemical products such as de-icing salts, while providing resistance to acids and alkalis. Its transparent film stops the penetration of contaminants, facilitating the maintenance of pavers.

DIRECTIONS

APPLICATION TO CONCRETE PAVERS

BEFORE YOU BEGIN

ALWAYS TEST on a small hidden area of approximately 0.4 m² (4 sq. ft.) to ensure that result meets your expectations (see Warranty).

- Do not apply to stamped or poured concrete. - Do not apply to polished material. - Apply only to bare material* or to material previously sealed with WL1-2, WL4 or WL5 Protectors from Techniseal. - Wait until the Protector is worn before recoating the surface (2 years minimum). - With the appropriate stripper, remove any unknown coating that was previously applied.
*ABSORPTION TEST: Sprinkle a few drops of water all over the surface. If water is absorbed, proceed with surface preparation and sealing. If water is repelled, do not apply this product.

SURFACE PREPARATION (CONCRETE PAVERS)
1. Protect vegetation, vehicles and adjacent surfaces that are not to be treated.
2. Remove stains with the appropriate Techniseal® stain removers.
3. Prepare the entire surface with Techniseal® Paver Prep (efflorescence cleaner), as directed on product label.

APPLICATION CONDITIONS
- Surface must be clean, dry and warm to the touch.
- Temperature must remain between 10 °C and 30 °C during the application and for the next 24 hours.
- No rain should be forecasted for the next 24 hours.
- Sprinkler system must be turned off.
- Use a consistent application method over the entire surface.

NECESSARY TOOLS
- Low-pressure solvent-resistant (acetone) airless sprayer (< 50 psi) or solvent-resistant (acetone) pump sprayer (best practice)
- Techniseal® Slit-Foam Roller and solvent-resistant paint tray

Do not dilute. Shake well or stir product before and during application. Work in sections of no more than 4,6 m² (50 sq. ft.)

Sprayer Application (Best Practice): Saturate a section with a single coat of Protector. With the roller, remove the excess on the surface before it dries. Repeat for subsequent sections, maintaining a wet edge in order to avoid overlapping marks.

Roller Application: Saturate the surface with a single coat of Protector, avoiding an accumulation of excess product. Maintain a wet edge in order to avoid overlapping marks.

TRAFFIC
Pedestrian: 24 h. / Vehicular: 48 h to 72 h. Block access during that period.

CAUTION
- Any new concrete product has the potential to produce efflorescence (whitish salts) on its surface. This Protector, like any film-forming coating, carries a small risk of trapping efflorescence beneath its film. Consult the paver manufacturer or contact Techniseal® at 1 800 465-7325 for more information. • Do not attempt sprayer application on windy days. • Do not apply this product over a blotchy or hazed surface. • Inadequate surface cleaning can result in uneven finish. • This product will make the surface more slippery when wet. If slipping is a concern, consider adding Surefoot anti-slip grit from Techniseal® in the Protector before the application. • Wait 30 days after the installation of polymeric sand before sealing the pavers. • An over-accumulation of product could lead to surface whitening. • Extreme climate or heavy traffic could limit product longevity.

APPLICATION TO WET-CAST PAVERS

BEFORE YOU BEGIN
ALWAYS TEST on a small hidden area of approximately 0,4 m² (4 sq. ft.) to ensure that result meets your expectations (see Warranty).
- Do not apply to stamped or poured concrete. • Do not apply to polished material. • Apply only to bare material* or to material previously sealed with WL1-2 or WCS Protectors from Techniseal. • Wait until the Protector is worn before recoating the surface (2 years minimum). • With the appropriate stripper, remove any unknown coating that was previously applied.

*ABSORPTION TEST: Sprinkle a few drops of water all over the surface. If water is absorbed, proceed with surface preparation and sealing. If water is repelled, do not apply this product.
SURFACE PREPARATION (WET-CAST PAVERS)
1. Protect vegetation, vehicles and adjacent surfaces that are not to be treated.
2. Remove stains with the appropriate stain removers.
3. Prepare the entire surface following recommendation from the wet-cast paver manufacturer. Once installed, a layer of efflorescence-like dust can form on the surface of some wet-cast pavers after a few days. It is critical that this layer be removed prior to applying the Protector.

APPLICATION CONDITIONS
- Surface must be clean, dry and warm to the touch.
- Temperature must remain between 10 °C and 30 °C during the application and for the next 24 hours.
- No rain should be forecasted for the next 24 hours.
- Sprinkler system must be turned off.
- Use a consistent application method over the entire surface.

NECESSARY TOOLS
- Low-pressure solvent-resistant (acetone) airless sprayer (< 50 psi) or solvent-resistant (acetone) pump sprayer (best practice)
- Techniseal® Slit-Foam Roller and solvent-resistant paint tray

Do not dilute. Shake well or stir product before and during application. Work in sections of no more than 4.6 m² (50 sq. ft.)

Sprayer Application (Best Practice): Saturate a section with a single coat of Protector. With the roller, remove the excess on the surface before it dries. Repeat for subsequent sections, maintaining a wet edge in order to avoid overlapping marks.

Roller Application: Saturate the surface with a single coat of Protector, avoiding an accumulation of excess product. Maintain a wet edge in order to avoid overlapping marks.

TRAFFIC
Pedestrian: 24 h. / Vehicular: 48 h to 72 h. Block access during that period.

CAUTION
- Any new concrete product has the potential to produce efflorescence (whitish salts) on its surface. This Protector, like any film-forming coating, carries a small risk of trapping efflorescence beneath its film. Consult the paver manufacturer or contact Techniseal® at 1 800 465-7325 for more information. Do not attempt sprayer application on windy days. Do not apply this product over a blotchy or hazed surface. Inadequate surface cleaning can result in uneven finish. This product will make the surface more slippery when wet. If slipping is a concern, consider adding Surefoot anti-slip grit from Techniseal® in the Protector before the application. Wait 30 days after the installation of polymeric sand before sealing the pavers. An over-accumulation of product could lead to surface whitening. Extreme climate or heavy traffic could limit product longevity.

APPLICATION TO NATURAL STONE

BEFORE YOU BEGIN
ALWAYS TEST on a small hidden area of approximately 0.4 m² (4 sq. ft.) to ensure that result meets your expectations (see Warranty).

- Do not apply to stamped or poured concrete. Consult with the stone manufacturer to see if your stones can be sealed. This Protector can be used with porous natural stones only. It is not suitable for granite, marble or dense natural stones. Do not apply on polished natural stone. Apply only to bare material* or to material previously sealed with WL1-2 or WL5 Protectors from Techniseal. Wait until the Protector is worn before recoating the surface (2 years minimum). With the appropriate stripper, remove any unknown coating that was previously applied.

*ABSORPTION TEST: Sprinkle a few drops of water all over the surface. If water is absorbed, proceed with surface preparation and sealing. If water is repelled, do not apply this product.
SURFACE PREPARATION (NATURAL STONE)
1. Protect vegetation, vehicles and adjacent surfaces that are not to be treated.
2. Remove stains with the appropriate stain removers.
3. Prepare the entire surface following recommendation from the stone manufacturer.

APPLICATION CONDITIONS
- Surface must be porous, clean, dry and warm to the touch.
- Temperature must remain between 10 °C and 30 °C during the application and for the next 24 hours.
- No rain should be forecasted for the next 24 hours.
- Sprinkler system must be turned off.
- Use a consistent application method over the entire surface.

NECESSARY TOOLS
- Low-pressure solvent-resistant (acetone) airless sprayer (< 50 psi) or solvent-resistant (acetone) pump sprayer (best practice)
- Techniseal® Slit-Foam Roller and solvent-resistant paint tray

Do not dilute. Shake well or stir product before and during application. Work in sections of no more than 4.6 m² (50 sq. ft.)

Sprayer Application (Best Practice): Saturate a section with a single coat of Protector. With the roller, remove the excess on the surface before it dries. Repeat for subsequent sections, maintaining a wet edge in order to avoid overlapping marks.

Roller Application: Saturate the surface with a single coat of Protector, avoiding an accumulation of excess product. Maintain a wet edge in order to avoid overlapping marks.

TRAFFIC
Pedestrian: 24 h. / Vehicular: 48 h to 72 h. Block access during that period.

CAUTION
- All natural stones are unique and will age differently. This Protector will not prevent the aging phenomenon from occurring.
- Do not attempt sprayer application on windy days. • Do not apply this product over a blotchy or hazed surface. • Inadequate surface preparation can result in uneven finish. • This product will make the surface more slippery when wet. If slipping is a concern, consider adding Surefoot anti-slip grit from Techniseal® in the Protector before the application. • An over-accumulation of product could lead to an uneven gloss on the surface. • Wait 30 days after the installation of polymeric sand before sealing the pavers. • Extreme climate or heavy traffic could limit product longevity.

APPLICATION TO STABILIZE SAND OR AGGREGATE JOINTS

BEFORE YOU BEGIN
ALWAYS TEST on a small hidden area of approximately 0.4 m² (4 sq. ft.) to ensure that result meets your expectations (see Warranty).

- Do not apply to stamped or poured concrete. • Do not apply to polished material. • Apply only to bare material* or to material previously sealed with WL1-2, WL5 or JSS Protectors from Techniseal. • Wait until the Protector is worn before recoating the surface (minimum 2 years). • With the appropriate stripper, remove any unknown coating that was previously applied.

*ABSORPTION TEST: Sprinkle a few drops of water all over the surface. If water is absorbed, proceed with surface preparation and sealing. If water is repelled, do not apply this product.

SURFACE PREPARATION (JOINT STABILIZATION)
1. Protect vegetation, vehicles and adjacent surfaces that are not to be treated.
2. Remove stains with the appropriate Techniseal® stain removers.
3. Prepare the entire surface with Techniseal® Paver Prep (efflorescence cleaner), as directed on product label.
APPLICATION CONDITIONS:

- Surface must be clean, dry and warm to the touch.
- Temperature must remain between 10 °C and 30 °C during the application and for the next 24 hours.
- No rain should be forecasted for the next 24 hours.
- Sprinkler system must be turned off.
- Use a consistent application method over entire surface.

NECESSARY TOOLS:

- Low-pressure solvent-resistant (acetone) airless sprayer (< 50 psi) or solvent-resistant (acetone) pump sprayer (mandatory)
- 3/8” polyester nap roller and solvent-resistant paint tray

Do not dilute. Shake well or stir product before and during application. Work in sections of no more than 4.6 m² (50 sq. ft.)

Sprayer Application: Saturate surface with a single coat of Protector. With the roller, redirect the excess product from the surface into the joints. Avoid displacing the aggregates with the roller. Repeat for subsequent sections, maintaining a wet edge to prevent overlap marks.

TRAFFIC

Pedestrian: 24 h. / Vehicular: 48 h to 72 h. Block access during that period.

CAUTION

- Any new concrete product has the potential to produce efflorescence (whitish salts) on its surface. This Protector, like any film-forming coating, carries a small risk of trapping efflorescence beneath its film. Consult the paver manufacturer or contact Techniseal® at 1 800 465-7325 for more information. • Do not attempt sprayer application on windy days. • Do not apply this product over a blotchy or hazed surface. • This product will make the surface more slippery when wet. If slipping is a problem, consider adding Surefoot anti-slip grit from Techniseal® in the Protector before the application. • An overaccumulation of product could lead to surface whitening. • Extreme climate or heavy traffic could limit product longevity. • Frequent and aggressive maintenance will affect aggregate joint binding.

COVERAGE

**As a concrete & wet-cast paver sealer and natural stone sealer:** Single-coat application 3,78 L covers up to 14 m² (150 sq. ft.) / 18,93 L cover up to 70 m² (750 sq. ft).

**As a joint stabilizer:** 3.78 L cover from 4.6 to 11.6 m² (50 to 125 sq. ft.) / 18.93 L cover from 23 to 60 m² (250 to 625 sq. ft).

Coverage will depend on joint width and type as well as surface porosity.

STORAGE

Store in a cool, dry place.

CLEANING & DISPOSAL

Wash tools with lacquer thinner. Consult your retailer or municipality regarding the disposal of empty containers or unused product.

SAFETY WARNINGS

For information and advice regarding transportation, handling, storage, first aid and disposal of chemicals products, users should refer to the actual Safety Data Sheet containing physical, ecological, toxicological and other safety-related data.

KEEP OUT OF THE REACH OF CHILDREN

EMERGENCY PHONE: CANUTEC (613) 996-6666

Do not get in eyes. Do not get on skin or clothing.
FIRST AID TREATMENT If swallowed, call a Poison Control Centre or doctor immediately. Do not induce vomiting. If in eyes, rinse with water for 15 minutes. If on skin, rinse well with water.

LIMITED WARRANTY

Having no control over the use of the products, Techniseal® does not guarantee finished work. Replacement of any defective product shall be the buyer’s sole remedy under this warranty. A proof of purchase will be required for any claim. Before using this product, user shall determine the suitability of the product for its intended use, and user alone assumes all risks and liability whatsoever in connection therewith. User shall test product in a small inconspicuous area (approx. 0,4 m²-4 sq. ft.). In the event that no test was carried out, the warranty will only apply to 0,4 m² (4 sq. ft.). This limited warranty excludes any liability for any consequential, incidental, indirect or special damages. Except for the limited warranty described above, manufacturer specifically disclaims and excludes any other express warranty, any implied warranty or merchantability or goods, and implied warranty of fitness of goods for any particular purpose.
