Canada and U.S.A.: dial 1 800 465-7325
Others: dial (514) 523-8324 (Canada)

APPLICATIONS

• Driveways, commercial parking lots, pedestrian areas, etc.

PROPERTIES

• Stops deterioration caused by water and frost
• Adherent, flexible and durable

DESCRIPTION

This Techniseal® Crack Filler for asphalt is a flexible compound designed to repair cracks 1 cm wide or less. Containing a high percentage of solids, it dries without losing volume. It protects against damage caused by water and freeze-thaw cycles. Easy to apply, it adheres strongly to inner walls of cracks and remains flexible to allow for asphalt movement.

Note: This product is formulated for cracks 1 cm (1/2") wide or less. For cracks wider than 1 cm, use Techniseal Acrylic Crack Filler [142-711].

DIRECTIONS

SURFACE PREPARATION
Clean cracks with a water jet; let dry completely. Fill deep cracks with fine sand to within 2 cm (3/4") of the surface.

APPLICATION
Content’s temperature must be above 12°C; however, product can be applied at a lower temperature. Cut nozzle at an angle to the desired diameter. Fill cracks to surface level. Let dry for 24 hours before applying sealant or allowing traffic on the surface. For a uniform appearance and maximum protection, apply a Protector for Asphalt from Techniseal® to the entire surface.

NOTE: Store at a temperature above 15°C.
