Professional Grade Oil & Grease Remover for Pavers

UPDATE

June 12, 2018
Make sure that you have an up-to-date technical data sheet in hand by consulting our Web site: techniseal.com
U.S.A. and Canada: dial 1 800 465-7325
Others: dial (514) 523-8324 (Canada)

APPLICATIONS

• Sealed or bare surfaces
• Pavers and slabs made of concrete or natural stone, poured or stamped concrete, masonry, etc.
• Driveways, pool decks, patios, terraces, commercial parking lots, pedestrian areas, etc.

PROPERTIES

• Removes penetrated petroleum-based products
• Ideal for older, penetrated stains
• Dries from a liquid to a powder
• No scrubbing – No rinsing – No mess

DESCRIPTION

Techniseal® Professional Grade Oil & Grease Remover is an industrial strength oil and grease remover. It lifts and absorbs embedded oil stains as it dries from a liquid to a powder. Specially formulated for concrete pavers, slabs and walls, natural stone, poured or stamped concrete, etc., Techniseal® Professional Grade Oil & Grease Remover works without damaging or discolouring the material and is easy to use.

DIRECTIONS

Important: Wear adequate protective clothing. ALWAYS TEST on a small hidden area to ensure that result meets your expectations. Do not use on asphalt. For best results, use when temperature is between 15°C and 25°C and provide maximum ventilation. During hot summer days, apply product in the evening and let work overnight.
APPLICATION

Shake well. Apply a generous amount of product to an oil or grease stain and let sit until product has turned to powder. With temperature above 15°C and good ventilation, this process should take between 5 and 8 hours. Process is slowed down and may be inhibited in lower temperatures. When the product has completely dried to a powder, sweep up with a broom and dispose of the powder.

Note: Surface may still appear dark immediately after powder is swept up. This is not oil; it is a citrus-based solvent that should evaporate within a few hours or days. IMPORTANT: This product will dissolve sealants.
