APPLICATIONS

• Asphalt shingle and sheet metal.

PROPERTIES

• Dislodges ground-in dirt and mildew
• Prepares surface for the application of Elastomeric Coating

DESCRIPTION

Techniseal® Roof Cleaner is a powder concentrate to be dissolved in water. It is specially designed to dislodge mildew, moss, fungus and ground-in dirt prior to the application of Techniseal® Elastomeric Roof Coating.

DIRECTIONS

BEFORE YOU BEGIN
ALWAYS TEST on a small hidden area of approximately to ensure that the result meets your expectations. Do not use near waterways, lakes and rivers.

PREPARATION
Remove moss build-ups with a stiff brush or a scraper.
Dilution: In a watering can, dissolve in warm water at the rate of 15 to 45 ml per litre of water.

APPLICATION
Using the watering can, cover the surface and let work for 15 minutes. Apply more product; scrub the surface, taking care not to let product dry; rinse thoroughly with a water jet. Keep rinse water from reaching the sewers. Repeat if necessary.
Note: On asphalt shingles, use a soft-bristle broom or scrub brush and avoid scrubbing vigorously as this could dislodge some of the granules.

CONSUMPTION
When diluted, 850 g of powder cleans 15 to 39 m² (170 to 425 sq. ft.). Consumption will depend on the condition of the surface being cleaned.
