Make sure that you have an up-to-date technical data sheet in hand by consulting our Web site: techniseal.com
Canada and U.S.A.: dial 1 800 465-7325
Others: dial (514) 523-8324 (Canada)

APPLICATIONS

• Bare, pressure-treated, painted or stained wood, etc.
• Decks, fences, pergolas, balconies, sidings, window frames, shingles, cornices, etc.

PROPERTIES

• Restores wood to its original appearance
• For decks, fences, siding, etc. (bare, stained, painted or varnished wood)
• Dislodges mildew, ground-in dirt and grease (barbecue)

DESCRIPTION

Techniseal® Wood Cleaner is a powder concentrate to be dissolved in water. It restores wood to its original appearance by removing its greyish or blackish shade. It dislodges mildew, ground-in dirt and grease (barbecue). On bare wood, it ensures proper penetration of Techniseal® Wood Protectors. On painted, stained or varnished surfaces, it reduces the gloss of the old coating, thus ensuring proper adhesion of the new finish.

DIRECTIONS

BEFORE YOU BEGIN

• Cover adjacent surfaces that are not to be treated. • ALWAYS TEST on a small hidden area to ensure that the result meets your expectations. • Do not use near waterways, lakes and rivers.

DILUTION

In a watering can, dissolve in warm water at the rate of 15 to 45 ml per liter of water, or 5 to 10 ml per liter of water if solution is applied to new or less than one year old cedar.
APPLICATION

Using a watering can, cover the surface and let work for 15 minutes. Scrub the surface along the wood grain pattern, taking care not to let product dry; rinse thoroughly with a water jet. Keep rinse water from reaching the sewers. Repeat if necessary.

Note: For easier, quicker and more effective rinsing, use a pressure water jet [500 to 1,000 lb./sq. in. (3,500 to 7,000 kPa)]. This method also allows you to skip scrubbing.

COVERAGE

850 g of diluted powder clean 15 to 39 m² (170 to 425 sq. ft.). Coverage will depend on the wood condition.
