

Rust Remover for Pavers

UPDATE

December 20, 2022

Make sure that you have an up-to-date technical data sheet in hand by consulting our website: techniseal.com

Canada and U.S.A.: dial 1 800 465-7325

Others: dial (514) 523-8324 (Canada)

APPLICATIONS

- Concrete pavers, slabs and walls

PROPERTIES

- Effectively removes stains caused by steel, rusted metal objects, fertilizers, etc.
- Contains no muriatic acid

DESCRIPTION

Techniseal® Rust Remover for pavers takes out rust from pavers made of concrete. It effectively dissolves stains caused by dripping rusted water, steel streaks, fertilizer granules¹, etc. Since it contains no muriatic acid, it won't damage the material. For bare or previously sealed surfaces.

¹To remove fertilizer stains from a large surface, it is recommended to use Techniseal® Pre-Seal Cleaner (141-534).

DIRECTIONS

BEFORE YOU BEGIN

- Wear rubber gloves and safety goggles.
- ALWAYS TEST on a small hidden area to ensure that result meets your expectations.

APPLICATION

Wet the stain and cover it with Rust Remover; using a small nylon scrub brush such as the Techniseal Stain remover brush (145-910), scrub the stain until dissolved; rinse immediately with water. If rust persists, repeat the operation.

IMPORTANT : Pavers may appear spotted after the use of Rust Remover. This is called a "clean stain". For uniform results, clean the entire surface with Techniseal® Pre-Seal Cleaner (141-534). Rust streaks left by metal snowploughs may be difficult to remove. **Do not use on non-acid resistant natural stone, wet-cast pavers or poured concrete.**

STORAGE

Product must be kept in its original, unopened and tightly sealed container, and stored in a dry and well ventilated place with controlled temperature 4 °C to 24 °C (40 °F to 75 °F). Keep sheltered from weather and direct sunlight.

PACKAGING
