Others: dial (514) 523-8324 (Canada)

APPLICATIONS
• For Techniseal® solvent-based Protectors.

PROPERTIES
• Easily mixes with Protector without changing its appearance
• Highly recommended for pool decks and sloped driveways

DESCRIPTION
Techniseal® Surefoot Anti-slip Grit mixes with all film-forming and solvent-based Techniseal® Protectors to reduce the slipperiness of sealed pavers and slabs. It provides a uniform coat and a safer, more slip-resistant surface where slips and falls are likely to occur, such as pool decks, access ramps, etc.

DIRECTIONS
BEFORE YOU BEGIN
Wear adequate protective clothing. ALWAYS TEST on a small hidden area of approximately 0.4 m² (4 sq. ft.) to ensure the results will meet your expectations.

APPLICATION
Add 5 spoons (spoon included) of Surefoot to 1 gal. of Techniseal® Paver Protector WL4, WL5 Recoater, WCS or JSS (or 24 spoons of Surefoot to 5 gal.). Mix well with a stick. Do not add more than the recommended amount, as it could affect the Protector’s film formation. Apply Protector as directed on product’s label. Stir Protector / Recoater occasionally during application to maintain the additive in suspension.

CAUTION
IMPORTANT: Do not mix product with other chemicals. Use Surefoot only with a Techniseal® solvent-based paver Protector.
