

WHO GRADE HAND SANITIZER

NPN: 80099543

ANOTHER CLEANING SOLUTION FROM TECHNISEAL®

In the wake of the global COVID-19 pandemic, hand hygiene is emerging as a key priority for communities around the world. In response to the widespread shortages of personal hygiene products all across North America, Techniseal® is pleased to announce the addition of a new medical-grade hand sanitizer to its product offering.

Compliant with the World Health Organization's highest standards, this powerful disinfectant meets all the criteria of a WHO-recommended Handrub Formulation.

With the introduction of this hand sanitizer, Techniseal® is proud to contribute to global efforts to stay safe throughout the current pandemic and during any other health crisis that could arise in the future.

PRODUCT ATTRIBUTES

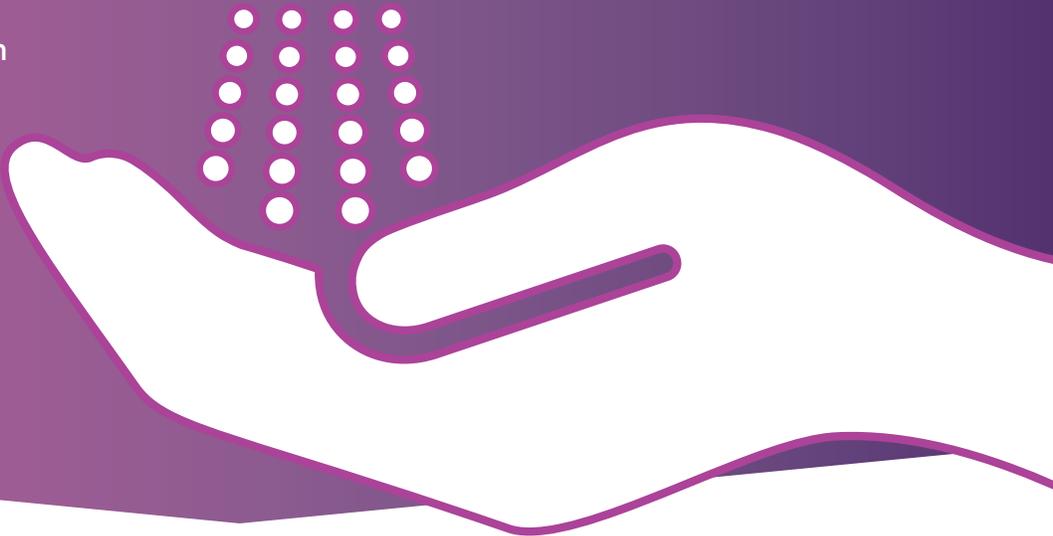

Techniseal®'s medical-grade hand sanitizer fully complies with the high standards of the WHO-recommended Handrub Formulation. Its antiseptic formula quickly rids hands of germs, bacteria, and viruses, at home, in the workplace, and in public spaces.

Approved by Health Canada, this hand sanitizer safeguards first responders, health experts, and other frontline workers against the risk of contamination.

Each 18,9 L box has a built-in lockable dispenser, allowing for easy use directly at sanitary checkpoints, or for easy and mess-free filling up of smaller-scale containers.

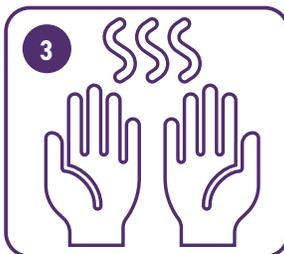

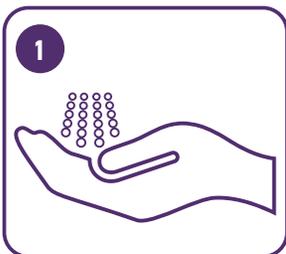

Product Code	UPC	NPN	Item Description	Weight	Dimensions W x H x D	Units per Pallet	Pallet Weight

- Compliant with the WHO – Recommended Handrub Formulation
- Approved by Health Canada
- Dries within seconds
- Built-in lockable dispenser
- Effective for first responders, health experts, and consumers
- Fragrance-free
- Ready to use

OPEN

- 1 Break the safety seal that covers the cap located on the top of the box
- 2 Remove the plastic cap
- 3 Pull out the lockable dispenser from inside the box.

USE

- 1 Rid your hands of any dirt, grease, or other organic matter. Apply a **palmful of hand sanitizer** to one hand.
- 2 **Rub both hands together for at least 30 seconds (or until dry)**; this will allow the sanitizer to penetrate fully. Make sure to spread the product so that it covers the whole surface of each hand (including between your fingers and on your fingernails).
- 3 Don't touch food or any surface until the disinfectant has fully dried.
